

# Apex:

Security Unleashed —  
Deploy Anywhere, Defend Everywhere.

Apex by Secure Passage is the ultimate security solution for challenging environments. Combining cutting-edge technology with rugged portability, this security station delivers continuous, real-time security management for events, properties, and critical infrastructure—no matter how remote or rugged the location. Designed for independent deployment, Apex is fully customizable, providing a scalable, all-in-one security solution that adapts to your needs.

## The Challenge:

Security threats don't wait for ideal conditions. Events, infrastructure, and remote properties are often vulnerable due to limited surveillance, blind spots, or delayed response times. Whether managing high-traffic public gatherings, securing remote job sites, or protecting critical assets, traditional security systems are often inadequate in unpredictable environments. Organizations need a deployable, intelligent solution that provides real-time visibility and response capabilities.

## The Solution:

**Apex** transforms any location into a secure, real-time monitoring hub. Featuring advanced video surveillance, intelligent sensors, and remote communication capabilities, it collects and processes critical data to keep security teams informed. Integrated with **Truman PDR (Physical Detection & Response)**, the revolutionary physical security solution by Secure Passage, as well as **Hx OIC (Operational Intelligence Center)**, Apex provides seamless remote monitoring, instant alerts, automated reporting, and can even be configured as a launch pad for our integrated **autonomous drones** to provide automated surveillance from above—ensuring uninterrupted oversight, enhanced situational awareness, and reduced risk.

Maximize your security investments with our **Strategic Technology Sourcing & Integration Services**. Learn more at: [www.securepassage.com](http://www.securepassage.com).

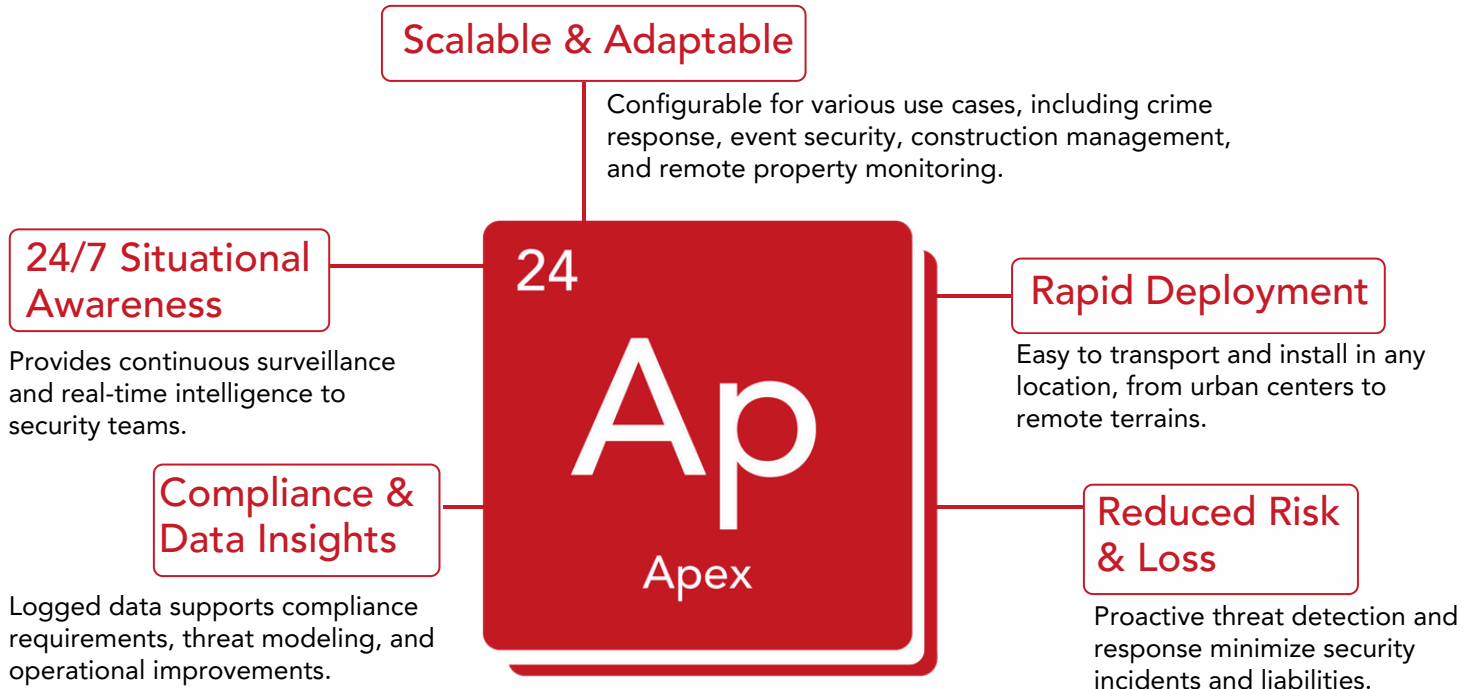

## Key Features:

- **Custom-Built & Deploy-Ready:** Tailored to your specs with integrated communication, security, surveillance, sensors, and power technology.
- **Real-Time Remote Monitoring:** Immediate notifications via text, email, and app, with tamper and vandalism detection.
- **Intelligent Sensor Technology:** Gunshot detection, aggressive behavior tracking, spoken word analysis.
- **Advanced Video Solutions:** License plate recognition, night and thermal vision, movement tracking, perimeter monitoring, and people counting.
- **Continuous Audio & Video Recording:** PTZ, thermal, and panoramic cameras ensure comprehensive coverage.
- **Environmental & Crowd Intelligence:** Local weather monitoring, pedestrian and traffic tracking, crowd movement analysis for dynamic response.

## Key Benefits:

### About Secure Passage:

Secure Passage is a leader in advanced security solutions, dedicated to protecting what matters most—human life. With a history of innovation in risk management, we deliver industry-leading tools that integrate technology, intelligence, and best practices. Our comprehensive security ecosystem includes the **Truman Physical Detection & Response Platform (PDR)** for proactive risk management, the **Haystax Operational Intelligence Center (OIC)** for organizational and community safety, and **Strategic Services** to address diverse integration and security sourcing needs. By providing organizations with the insights and resources to enhance safety in schools, workplaces, and communities, Secure Passage continues to build trust and resilience nationwide.

### WHY CONNEX BOXES?

Apex Box is built on the foundation of Connex shipping containers—trusted for their strength, durability, and transportability. Secure Passage adapts these battle-tested structures into customized security hubs tailored to your operational needs.

- **Corrugated Steel:** Withstands impacts, harsh weather, and rugged handling.
- **Transit-Ready:** Designed for crane, forklift, rail, and truck transport for easy delivery and deployment.
- **Weather & Tamper Resistant:** Sealed to prevent moisture intrusion and unauthorized access.

Secure Passage converts existing containers or designs purpose-built units with features like secure man doors, air conditioning, generator and fuel housing, and more. Whether used as a Mobile Command Center, Job-Site Trailer, Personal Bunker, or other customizations, Apex Box is built to secure your critical assets.
