

# Apex Secure Box

*Portable Security. Superior Protection.*

The **Apex Box** by **Secure Passage** combines portability and premier security technologies for continuous, reliable property and event management in even the most remote and rugged locations. It's a fully customizable, all-in-one solution for rapid video and intelligent sensor deployment, designed for independent deployment and hard-to-secure places.

## Anytime, Anywhere

Transform any location, however rugged or populous, into a portable, real-time crime/event/property monitoring solution, data source, or Command Center. The **Apex Box** collects real-time information via its array of intelligent sensor and video feeds into our converged security platform, providing instant data and alerts to you and your security team for round-the-clock, uninterrupted surveillance and lowered risk and cost of loss, for enhanced critical business, personal, and community operations.

### Power & Communication

Whether pre, on, or off-grid, power and communication sources are configured for 24/7 surveillance.

**Power:** Built-in reliability and redundancy with shore or energy efficient solar and battery options. Gas or Diesel generator connections, optional.

**Comms:** Built-in cellular, wi-fi and satellite network connectivity.

### Apex Box deploys security where you need it:

- Remote Command Center for Crime and Emergency Response
- Remote Infrastructure – i.e. Wireless Carrier & Regional Telecom Location
- Construction Site Security & Management
- Large/Special Event Risk Management
- Remote Property Visibility & Management

## Real-Time Remote Management & Data

Our innovative technology collects and processes data about environmental conditions, crowds, and other hot zones to aid in decision-making for events, movement, or crowd control. All data can be logged and stored for compliance, threat modeling, and other vital data insights, giving security teams immediate communication and visibility in blind-spot or temporary areas, as well as ease of reporting for future management and maintenance.

## Highlights

- Custom-built to meet your unique needs and delivered deploy-ready with multiple input/outputs for Comms, Security, Surveillance, Sensors, and Power Technology
- Remote Monitoring Service & Support – notifications (text, email, app), logs, vandalism, tamper sensing.
- Intelligent Sensors – gunshot detection, aggressive behavior tracking, spoken word detection.
- Advanced Video Solutions - license plate reading, night and thermal vision, movement and perimeter monitoring, people counting.
- Continuous Audio and Video Recording - PTZ, Thermal and Panorama cameras.
- Real-time, Local Weather Monitoring
- Pedestrian, Traffic, and Crowd Monitoring

## Why Connex Boxes?

Built to withstand the rigors of global trade transit by land and sea, Connex boxes are renowned for their durability and toughness, protecting their contents from the various environmental hazards and physical stresses encountered during transportation.

- **Corrugated Steel Material:** Built to withstand rough handling at sea, port, and in-transit, this material provides exceptional strength and resistance to bending, crushing, and impacts.
- **Transit-Ready:** Built for handling (crane, forklift) and transit (rail, truck) equipment = easy delivery and deployment logistics.
- **Extreme Weather Resistance:** With an exterior that can withstand the elements of the open sea, weatherproof seals and locking mechanisms protect contents from moisture and theft.

Adapted by **Secure Passage** to meet your on-site and remote property security needs, our team can convert existing shipping containers or build custom, purpose-built containers in any size with your required features – secure man doors, air conditioners, generator and fuel housing, and more. Inner functions can be configured from simple storage and item transport to Mobile Command Center, Job-Site Trailer, Personal Bunker, and more.

Easy to deploy and impervious to the elements, combined with the tools and cutting-edge technology of **Secure Passage**, we literally deliver the ultimate tool “box” to solve your property security needs = **Apex Box**.

## About Secure Passage

With over 25 years in the physical security industry and 30 years of experience in cybersecurity, **Secure Passage** is renowned for providing the right information at the right time for federal, state, local, and enterprise security teams. We help secure everything from the neighborhood school to major assets and critical infrastructure, as well as world stage events including political conventions, papal visits, the Indy 500, and a dozen Super Bowls. As a leader in Converged Security (digital + physical security), **Secure Passage** unites your physical security tools (cameras, badges, sensors) and digital security data for cohesive visibility and comprehensive, coordinated response.
