Meet the constantly evolving challenges of providing safe learning environments for your students, staff, and local security partners by integrating all vital incident and school facility information into a single-view, online platform. With instant access to the right information at the right time, the Haystax School Safety Platform makes your schools and community safer.

Know your Entire School Community

Haystax enables all school safety stakeholders to work collaboratively with single, common view.

- Collect and manage critical information about every school with detailed custom safety profiles for each.
- In compliance with state and federal requirements, conduct Physical Assessments for a better understanding of specific safety needs and implement consistent best practices, regardless of campus size or geography.
- Import your data, emergency plans, floor plans, contact information, photos, and more.
- Conduct Student Behavioral Assessments for a better understanding of your school community, integrated into the platform for cohesive and informed decision-making.
- Integrate and optimize existing security tool safety data – camera feeds, badges, door logs, etc.

Understand your Community Risks:

Keep up with rapidly emerging threat activity in and around your schools, with multiple merged data sources.

- Use dedicated mobile apps to instantly report bullying, drug and gang activity, suspicious packages and more, leveraging all staff and stakeholders for improved awareness, prevention, and response.
- Add scheduled events such as safety drills, school fairs, and sporting events for added context.
- Integrate data feeds, including news, traffic, weather, and 911 calls, with other data and display in map or timeline view for clearer security awareness.

Share Community Threat Awareness:

Display all dynamic and static school safety data in a single, common view for all stakeholders.

- Instantly view new data and automated alerts wherever you may be.
- Generate reports from asset, assessment, incident, and event data and share with school leadership and the community stakeholders, as you require.
- Haystax Mobile, our platform optimized in an App for anytime/anywhere access, analysis, and informed decision-making for all stakeholders.

About Secure Passage

Secure Passage is renowned for providing the right information at the right time for federal, state, local, and enterprise security teams. We help secure everything from the neighborhood school to major assets and critical infrastructure, as well as events on the world stage including political conventions, papal visits, the Indy 500, and a dozen Super Bowls.

Houston, Texas: First Responders needed immediate access to accurate data and information to act quickly – as is common in rapidly evolving school and public safety events and incidents.

While no students, staff, or police were injured, and the subject quickly detained – **Houston Urban Area Security Initiative Administrator, David Lindsey, and Nathan Byrd, MSM, Critical Infrastructure Liaison**, attribute the incident's rapid and safe resolution to the use of Secure Passage's Haystax Platform and its real-time intelligence and data. When seconds matter, the Haystax Platform enables safe, rapid responses across teams and jurisdictions with a single, common view.

The Haystax Platform enables the **City of Houston** to know and understand its entire school community and does the same at the state level in partnership with the **Florida Department of Education** and state lawmakers to secure all 6,000+ public schools across the **State of Florida**.

Whether tracking assets, conducting safety or behavioral assessments, or tying together relevant data and alerts from physical and digital systems, the Haystax Platform organizes data and quantifies risk to people, places, and other assets. So, when planned events are underway or unexpected incidents arise, **you're ready for action**.

Nathan B. · Following
Critical Infrastructure Liaison at the City of Houston

I'd like to give **Haystax** and our new UASI Haystax administrator **David Lindsey** a hearty shoutout, first responders used the program to quickly access maps of the school as they arrived on a dangerous scene yesterday. Fortunately no one was injured and the suspect was quickly detained, but this kind of real time intel is necessary for safe rapid responses. #schoolsafety #firstresponders #haystax
