Truman PDR:

Physical Detection & Response

The Challenge:

Risk in the modern security landscape is interconnected. Physical security breaches can quickly escalate into a digital crisis. Cyber-physical attacks, insider threats, and complex events exploit these interdependencies. A Physical Detection and Response (PDR) platform that unifies physical security, IT, IoT, and OT systems is crucial for managing this complex risk environment.

- **Limited Visibility:** Separate systems and data create gaps in understanding, making it hard to detect and respond to threats effectively.
- **Slow Response:** Manual processes and a lack of real-time information delay incident response, increasing risk.
- **Information Overload:** Too many alerts from disparate systems can lead to missed critical events and inefficient security operations.
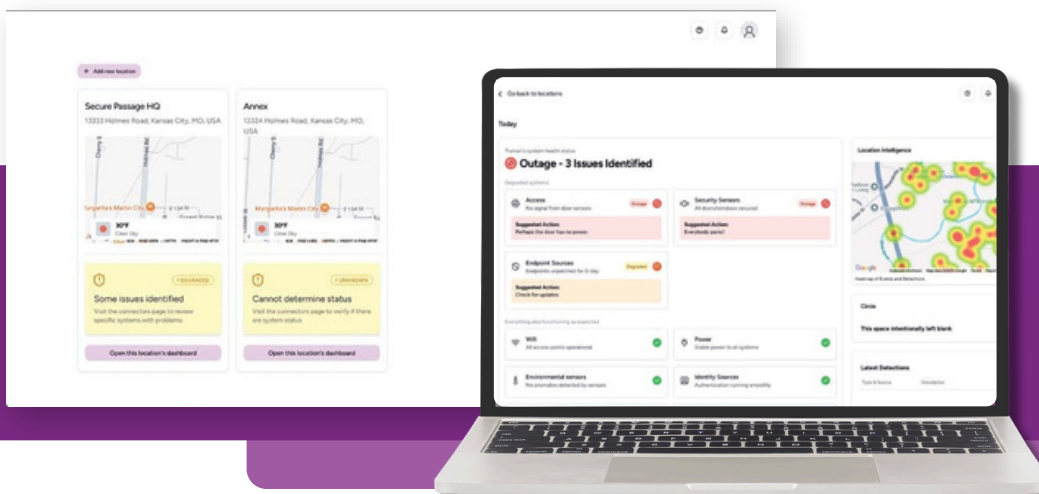

The Solution:

The **Truman Physical Detection & Response Platform** helps organizations overcome these challenges by bringing together physical and digital security data into a single, actionable platform. Truman provides the tools to detect, analyze, and respond to threats in real-time, improving your overall security.

Key Features:

- **Centralized Data:** Integrate data from all your security systems, including access control, video surveillance, threat intelligence, IT networks, IoT devices, and OT systems.
- **Automated Incident Response:** Set up automated actions based on pre-defined rules and threat intelligence to speed up response times and minimize disruption.
- **Real-Time Insights:** Get a complete view of your security situation through interactive dashboards, maps, and customizable alerts.
- **Simplified Investigations:** Streamline investigations with powerful search and analysis tools, including video analytics and event correlation.
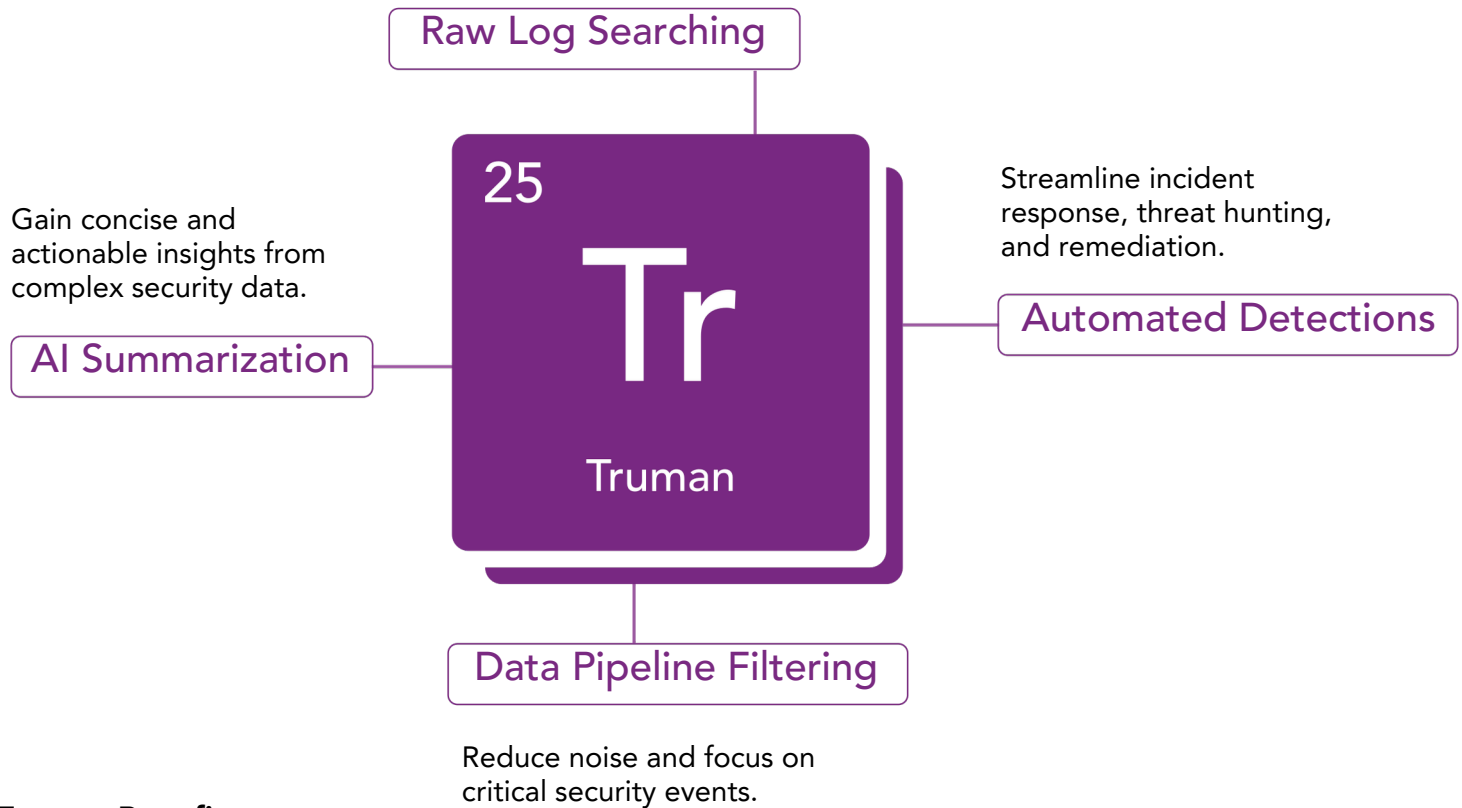

What is PDR?
The fusion of traditional physical security—cameras, access controls, and sensors—with digital systems like AI-driven analytics creates a more cohesive and proactive defense. This integration enables real-time threat detection (e.g., unauthorized entry, suspicious behavior) and swift, data-driven responses.

Truman

Streamline incident response, threat hunting, and remediation.

Automated Detections

Data Pipeline Filtering

Reduce noise and focus on critical security events.

Truman Benefits:

The Truman PDR solution enables organizations to:

- **Reduce Risk:** Proactively identify and address potential threats before they impact operations.
- **Optimize Resources:** Improve security operations, make incident response more efficient, and reduce manual work.
- **Improve Situational Awareness:** Understand security events and their potential impact in real time.
- **Strengthen Compliance:** Meet regulatory requirements and industry best practices for physical security and data protection.

Truman Delivers:

- Reduced Alert Fatigue
- Faster Incident Response
- Improved Threat Detection
- Enhanced Security Posture
- Lower Operational Costs

Secure Passage is committed to safeguarding what matters most: Humans. Our comprehensive security ecosystem includes the **Truman Physical Detection & Response Platform** for proactive risk management, the **Haystax Operational Intelligence Center** for organization and community safety, and **Strategic Services** to address diverse security needs. By delivering cutting-edge security solutions, Secure Passage continues to build trust and resilience within cities and communities across the country.
